

**Teachable Moments for Planning Councils/
Planning Bodies: Providing Low-Cost/
High-Benefit Mini-Training**

*Milton L. Butler, Co-Chair, St. Louis Regional HIV Health Services
Planning Council*

*Victoria "Tori" Williams, MSW, Director, Houston Ryan White
Office of Support*

Emily Gantz McKay, MA, President, EGM Consulting, LLC

This workshop was developed as part of the Community HIV/AIDS Technical Assistance and Training (Planning CHATT) Project

Workshop Purposes

- Present and demonstrate strategies for building RWHAP planning council/planning body (PC/PB) capacity through taking advantage of “mini-training” opportunities as part of ongoing activities
- Provide examples of practical, innovative, interactive, low-cost strategies that can help current and potential PC/PB members build knowledge and skills needed for active engagement in HIV community planning and sound, data-based decision making
- Demonstrate how mini-training can help overcome training barriers around scheduling and participation

Learning Outcomes

1. To identify at least 5 opportunities for mini-training of planning council/planning body or committee members that arise as part of existing planning activities
2. To describe at least 3 characteristics of effective mini-training activities
3. To describe the steps in planning and implementing mini-training opportunities in your planning council/planning body

HRSA/HAB Expectations for PC/PB Training

- Each RWHAP PC/PB is expected to provide members:
 - Orientation when they join the PC/PB
 - “Ongoing, annual membership training” – which must be addressed in the annual letter of assurance (planning council) or concurrence (planning body) that accompanies the annual application [2019 Part A NOFO, p 17]
- PLWH/Consumer members of RWHAP planning bodies should receive orientation and training [Part B Manual, p 78]

Why Training Matters

- Ryan White HIV/AIDS Program (RWHAP) is complex – many components and requirements
- PC/PBs play a unique role as diverse HIV community planning bodies – but their value depends on member knowledge and engagement
- RWHAP Part A planning councils decide how millions of dollars in Part A and Part A Minority AIDS Initiative (MAI) funds are used:
 - What services receive funding and how much
 - Needed service models and targeting of funds to particular PLWH subpopulations or locations (through directives)
 - Other planning bodies recommend funding and service models

Need for Training: Understanding a Complex Program

- A complicated system of HIV care – including RWHAP-funded and other services
- 28 “fundable” medical and support service categories
- Planning for diverse subpopulations of people living with HIV (PLWH) that need different services and models of care
- Hugely increased amounts and types of data for decision making
- Growing focus on performance measures and clinical outcomes
- Numerous federal, state, and local requirements to follow

Special Challenges for Consumers and Other “New Community Planners”

- Some PC/PB members do planning as part of their job
- Others have no prior experience in HIV community planning
- New planners often have different and greater training needs
- RWHAP PC/PBs typically have strict annual calendars and deadlines
- New members face special challenges during their first planning cycle
 - “Learning the program” often takes more than a year – but members are expected to help make decisions immediately
 - Veteran members may dominate the process
 - Experienced members may not feel the same need for training

Importance of Multiple Mini-Training Opportunities and Strategies

- People learn in different ways
- Long training sessions may try to cover too much – with low retention
- People learn best through multiple exposures to the same information
- Learning happens best when the information is used immediately
- Scheduling special training sessions can be difficult – it’s easier to do training at or around scheduled meetings
- Providing training to potential PC/PB members makes them better prepared once appointed

Training Challenges

Please share with the group:

What challenges does your RWHAP program face in providing orientation and training for your planning council or other planning body?

Consumer Training Challenges, Needs, and Strategies: Milton L. Butler, Co-Chair, *St. Louis Regional HIV Health Services Planning Council*

Consumers Need Training on Many Topics

- The local “system of HIV care”
- Different types of data – and how information is collected
- How specific data or findings can be used to improve services
- How to advocate on behalf of all PLWH, not just your own needs
- What processes are by the planning council to make decisions
- How to present your views to the planning council and be listened to – and stay firm in the face of opposition

Approaches to Mini-Training for Consumers

- **When data are presented**, take a few extra minutes to:
 - Highlight important information and discuss what it means in terms of service needs
 - Point out differences in outcomes for certain groups and ask why that might be happening and what could be done to improve outcomes for a particular group
- **When an important topic is brought to the planning council or planning body:**
 - Spend a few minutes before the meeting discussing the issue, why it is important, and what questions consumers may want to ask
 - Spend a few minutes after the meeting discussing what happened

Examples of Consumer Mini-Training in St. Louis

- **During the epidemiologic profile presentation:** discussion of what the trends mean in terms of service needs
 - Example: Look at the number of people who are out of care or unaware of their status – what does that mean in terms of service needs?
- **Before the Planning Council meeting:** review of the agenda and background on major issues for discussion and decision making
- **After the Planning Council meeting:** review of what happened and what those decisions will mean for PLWH and services
- **At Consumer Advocacy Committee (CAC) meetings:**
 - Example: Review of each question in the consumer survey, along with training on why the information is needed and what can be done with it

An Example: Learning to Use Data for Decision Making

- Annual data presentation included findings on what services clients felt would help them continue in HIV medical care
- Teachable Moment:
 - Importance of looking at findings for populations of interest
 - For African American MSM aged 24-34 and 35-49, rental assistance was #2 or #3 – need was for one more month of rental assistance per year
 - Link made between this finding and the TGA's Minority AIDS Initiative (MAI) program
- Use of this finding led to additional funds being moved into Rental Assistance using Carryover Funds and requirements changed to allow one more month of assistance

Populations of Interest Data: Services that would Help Clients Continue HIV Medical Care [Selected Groups]

	All Clients N = 643	African American MSM 24-34 N = 70	African American MSM 35-49 N = 38	Hispanics N = 24	Transgender Women N = 12	50 & Older N = 203
1	Case Mgmt	Case Mgmt	Case Mgmt	Case Mgmt	Transportation	Case Mgmt
2	Dental Services	Rental Assistance	Utility Assistance	Dental Services	Case Mgmt	Dental Services
3	ADAP Medication Coverage	Dental Services	Rental Assistance	Utility Asst/ Doctor Visits/Labs	Dental Servs/ Groceries/Hot Meals	ADAP Medication Coverage

Plan for Use of Requested MAI Carryover Funds

Service Prioritization	Planned Service Category	Carryover Amount Requested	Notes	One Time Planned Expense?
5	Housing	\$25,000	Provide an additional month of rental assistance for MAI clients in MAI emergency housing [\$500 (avg. per month) x 50 clients = \$25,000]	Yes
13	Early Interv. Services (EIS)	\$27,508	To fund EIS in FY 2018 at the same funding level as FY 2017	Yes
13	Early Interv. Services (EIS)	\$16,603	To fund Needs Assessment lost-to-care survey to be administered by DIS workers	Yes

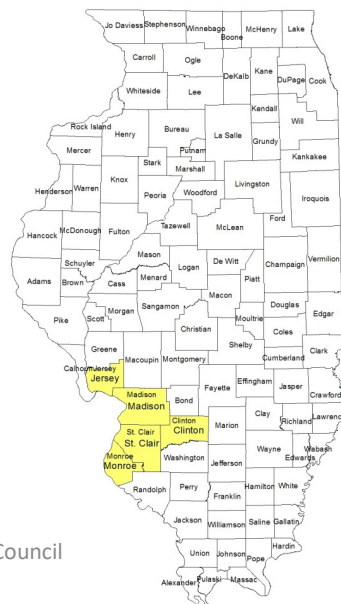

Another Example: Understanding Unmet Need Data

- The following 3 slides were used to present and discuss unmet need with the Consumer Advocacy Committee
- Mini-training helped consumers to:
 - Understand this information
 - Think about action needed to reduce unmet need
 - Consider what they can do as planning council members

St. Louis Transitional Grant Area

2018 Metro STL HIV Planning Council
Needs Assessment Summary

Estimate and Assessment of Unmet Need

Estimate of unmet need: The estimated number of people in a specific geographic area who know they are living with HIV but are not receiving regular HIV-related primary medical care.

Assessment of unmet need: Information about people who know they are living with HIV, but are not receiving regular HIV-related primary medical care.

Aware
But Not
In Care

Source: 2018 Metro STL HIV Planning Council Needs Assessment Summary

Estimate of Unmet Need

MO STL TGA 2017 Estimate:

Persons in the MO STL TGA who did not have evidence of HIV medical care (CD4 or Viral Load) in 2017.

The MO STL TGA Unmet Need Estimate:

31.1% or 1,939 PLWHA

What does this mean?

In 2017, of the 6,230 PLWHA living in the MO STL TGA, 31.1% (1,939) of PLWHA did not have evidence of care.

IL Region 4 2016 Estimate:

Persons in the IL Region 4 who did not have an HIV lab result and not enrolled in Ryan White/ADAP or Medicaid in 2016.

The IL Region 4 Unmet Need Estimate:

44% or 581 PLWHA

What does this mean?

In 2016, of the 1,324 PLWHA living in IL Region 4, 44% (581) of PLWHA did not have evidence of care.

Assessment of Unmet Need

Information about the percent of people **who know they are living with HIV**, but are not receiving regular HIV-related primary medical care, in the **Missouri counties of the St. Louis TGA**

Race/Ethnicity	%
Black/Afr Am Male	29.9%
Black/Afr Am Female	26.2%
White Male	34.6%
White Female	26.5%

“How to Best Meet The Need” Workshop Training

Tools Used in the FY 2019 Decision-Making Process

Houston Area HIV Services Ryan White Planning Council
1:30 pm – 4:00 pm, Thursday, April 12, 2018
2223 W. Loop South, Room 532, Houston, TX 77027

April (cont. 3)

2016 Epidemiologic Overview

Describes HIV disease trends in the Houston Area

From the 2017-2021 Comprehensive Plan

- **Socio-demographics of the Houston Area Population (Page 8)**
What are the socio-demographic characteristics of the general population in the Houston Area? (E.g., population data, social determinants, community indicators)
- **Demographic and Socioeconomic Characteristics of People Living with HIV Diagnosis (PLWH) in the Houston Area (Page 11)**
What is the current scope of the HIV epidemic in the Houston Area? (E.g., current new diagnoses and prevalence)
- **HIV Burden in the Houston Area (Page 19)**
How has the HIV epidemic changed in the Houston Area over time, and which areas and groups are most impacted? (E.g., prevalence, new diagnoses, and mortality over time, prevalence by zip code, progression to Stage 3 HIV, and mortality)
- **Indicators of Risk for HIV Infection in the Houston Area (Page 25)**
Which groups in the Houston Area are at higher risk for acquiring new HIV infection? (E.g., sexual risk behaviors, higher risk among MSM, IDU, and heterosexuals, testing, comorbidity and co-infection)

April (cont. 4)

HIV Care Continuum

Describes engagement in care in the Houston Area from diagnosis to viral suppression

- Also called the Treatment Cascade, Spectrum of Engagement, or the Gardner Cascade
- Provides “big picture” view of engagement in HIV care at all stages within a given timespan (usually 12 months)
 - All individuals **living with HIV**
 - Those aware of their status
 - Those who are unaware of the status (greater likelihood of HIV transmission)
 - All individuals who have **received a positive diagnosis**
 - All individuals with **met need** for HIV medical care
 - All individuals **retained** in HIV care in a HIV medical care
 - All individuals **prescribed** (and, presumably taking) HIV medications
 - All individuals with **viral load suppression** (lower likelihood of HIV transmission)
- Helpful for identifying system-wide gaps in service linkage and retention in care “at a glance”

April (cont. 5)

“Okay, but how will any of this help us determine How to Best Meet the Need?”

Based on today’s presentation, which of the decision-making tools could you use to answer each question?

- “What proportion of consumers using Medical Case Management have undetectable viral loads?”
Performance Measure Reports
- “What kinds of barriers do consumers experience when trying to get Transportation services?”
Needs Assessment and Special Studies
- “What are the emerging epidemiologic trends in HIV disease in the Houston EMA?”
Epidemiological Overview
- “How many consumers received bus passes in 2016?”
Service Utilization Reports
- “How much funding is currently allocated for Primary Care/DAMC?”
Financial Reports
- “What are the Houston Area’s priorities over the next five years?”
2017-2021 Comprehensive Plan
- “Which subpopulations have greater proportions of individuals who are out-of-care?”
Unmet Need Framework
- “How many people living with HIV in the Houston EMA were retained in care in 2015?”
Continuum of Care

April (cont. 6)

Specific Service Categories

Primary Care

	2014	2016	Change
Ranking of Need:	87% need #1 of all services	94% need #1 of all services	%: ↑ Rank: ---
Accessibility:	85% accessible #1 of all services (tied with Day Treatment)	90% accessible #3 of all services	%: ↑ Rank: ↓
Barriers Reported:	<ol style="list-style-type: none"> Wait time—14% Did not know where to go—12% Lack of transportation—10% Inconvenient appointments—9% Fear of HIV status disclosure—7% 	<ol style="list-style-type: none"> Administrative—19% Interactions with Staff—14% Transportation—14% Wait—14% Education and Awareness—10% 	

HIV in the Houston Area

Q. Which groups does HIV disproportionately affect in the Houston Area?

A. Using the total 2016 Houston EMA HIV diagnosis rate (21.9 per 100,000 population) as a benchmark, the following populations experience disproportionately higher rates of new HIV diagnoses:

- 163% higher rate among Black/African Americans individuals
- 156% higher rate among individuals age 25-34
- 58% higher rate among males (sex at birth)
- 30% higher rate among individuals age 13-24
- 23% higher rate among individuals age 35-44
- 11% higher rate among individuals age 45-54

While there has been no change in **which** groups experience disproportionately higher new diagnoses since 2011, the **extent of disproportionality** within each population group **has** changed in the Houston EMA. The following groups experienced the greatest increase in extent of disproportionality between 2011 and 2016:

- 81 percentage point increase among individuals age 25-34
- 11 percentage point increase among Hispanic individuals

Unmet Need--Who is Out-of-Care?

Q. What is unmet need?

A. Unmet need is when a person diagnosed with HIV is not in HIV medical care. To be out-of-care, a person has had none of the following in a 12 month period: (1) an HIV medical visit, (2) an HIV monitoring test (either a CD4 or viral load), or (3) a prescription for HIV medication.

Q. How many PLWHA are out-of-care in the Houston EMA?

A. In 2016, there were 6,537 people are out of care in the EMA, or 24% of all diagnosed PLWH.

Q. Who is out-of-care in the Houston EMA?

- A.** The highest proportions of people out of care in 2016 were:
- 25% of male (sex at birth) diagnosed PLWH
 - 28% of other race/ethnicity diagnosed PLWH
 - 26% of Hispanic diagnosed PLWH
 - 25% of Black/African American diagnosed PLWH
 - 26% of diagnosed PLWH age 35-44
 - 26% of diagnosed PLWH age 55 and over
 - 28% of diagnosed PLWH with an injection drug use risk factor
 - 27% of people diagnosed with HIV between 2006 and 2010

Specific Service Categories

- Hosted by Affected Community Committee
- Co-Chaired by Consumers
- Educational presentation (20 – 30 minutes)
- Results of the HTBMN and Priority & Allocations Processes

August

Affected Community Committee

- Training on Standards of Care and Performance Measure Review

General Standard 3.2: "Agency has Policy and Procedure regarding client Confidentiality [...] Providers must implement mechanisms to ensure protection of clients' confidentiality in all processes throughout the agency."

All our nurses now have degrees...unfortunately nurse Flairlight's is in the expressive arts!

Oral Health 2.8: "Oral hygiene instructions (OHI) should be provided annually to each client."

To help emphasize good oral hygiene in kids, Dr. Flambord installed a dental floss sign in his office.

"Mrs. Cranley! You need to sign this HIPAA privacy form before the doctor can look at those warts on your stomach!"

Primary Medical Care 1.1: "Medical care for HIV infected persons shall be provided by MD, NP, CNS or PA licensed in the State of Texas and has at least two years paid experience in HIV/AIDS care including fellowship."

Components of the Process

What services are needed to manage HIV effectively?

How to Best Meet the Need

Which services are highest priority, and...

Priorities and Allocations (P&A)

How much funding will each service receive?

How will each service be provided and evaluated?

Standards of Care (SOC) & Performance Measures (PM)

Houston Has Standards!

If you were planning on buying a car, what are some basic features you would expect to “come standard” with a good quality car?

- A working engine
- Steering wheel
- Brakes
- Seatbelts
- Air conditioner – A must-have in Houston!

Just as you would expect basic features to “come standard” when buying a car, you can also expect basic levels of quality to “come standard” with HIV care services in Houston. We call these Standards of Care (SOC).

September Consumer-Only Workgroup Meeting

You are invited to a *consumer-only* workgroup to discuss
Standards of Care and Performance Measures
for Ryan White funded HIV services

Examples of services to be discussed:

- ✓ Primary Medical Care
- ✓ Case Management
- ✓ Dental Care
- ✓ Local Pharmacy Assistance
- ✓ Professional Counseling
- ✓ Transportation
- ✓ Medical Nutritional Therapy & Supplements

Standards of Care are the minimal acceptable levels of quality in service delivery based upon accepted industry guidelines and practices. Houston area standards relate to issues such as staff training and supervision, client rights and confidentiality, timeliness of service delivery, allowable activities, the minimum services each client should receive, and more.

Performance Measures indicate to what extent a service has achieved its desired outcomes. Examples of Houston area performance measures include: health status (such as viral load and CD4 increases and decreases), quality of life, cost-effectiveness, adherence to treatment and more.

Monday, September 17, 2018
12:00 p.m. – Consumer Workgroup
Harris County Annex 83
2223 West Loop South, Room 416
Houston, Texas 77027

Decision-Makers

Implementing Mini-Training

What Makes Consumer Mini-Training Successful

- Training involves active learning – discussion and an exercise
- Training is linked to real PC/PB work and decision making – so new knowledge is used for something important
- Participants receive information ahead of time so they can read and discuss it – and be ready to participate
- Presenter/trainer focuses on less experienced members rather than those who already know the topic
- Presenter/trainer uses plain language, avoids jargon, and explains new terms
- Presenter recognizes differences in literacy levels – and understands that limited education does NOT mean limited intelligence

Steps to Implement Ongoing Mini-Training

1. **Assess training needs at least annually** – for all members, consumer members, committee members, and potential members
2. **Identify “Teachable Moments”** – mini-training opportunities that fit into your annual work plan and calendar:
 - As part of all data presentations
 - During consumer and other committee meetings
 - Before or after PC/PB meetings
 - As part of interactions with existing consumer or other groups
3. **Develop an annual training plan** that combines mini-training with orientation, retreats, and other training
 - Consider having one plan for current members and another for the consumer committee

Implementation Steps, Cont.

- 4. Develop guidelines and tips for effective mini-training**
 - Prepare a mini-training “tip sheet”
 - Document a few examples of effective presentations and activities to share
- 5. Find, assign, and prepare trainers – using your tips and calendar**
 - PC/PB, recipient, and other public health department staff
 - PC/PB and committee members
 - Topic experts from providers, universities, and other entities
- 6. Implement, assess, debrief, and improve**

Sum Up

- RWHAP planning councils and other planning bodies play a key role in ensuring comprehensive, appropriate systems of care for PLWH
- To be effective HIV community planners, all members need orientation and ongoing training – and members new to community planning need additional attention
- Well designed mini-training can help meet training needs
- Scheduled PC/PB activities provide year-round opportunities for mini-training
- A structured approach provide for practical, low-cost, innovative, interactive mini-training sessions as an integral part of PC/PB activities

Thank You!
